	HALLS				
	Gineral				
	The tariffs of charges set out under the various categories below shall include all the facilities in				
	connection therewith and shall be payable in advance. No reservation will be made or date for any hall will be reserved unless the amount for the bired accommodation together with the refundable deposit,				
	has been paid in full.				
	The full rental amount, excluding the deposit, will be forfeited to Council when the hirer cancels or postpones a reservation, unless Council is notified in writing at least 30 days prior to the reserved date				
	about the cancellation				
	Any hall referred to below and all facilities and services concerned shall, at the discretion of Council,				
	be made available free of charge for civic mayoral functions, functions and meetings held by Council, municipal elections and functions specially approved by Council.				
	A hirer shall re-arrange and clean the premises and exterior surrounding of the under mentioned balls				
	and/or facilities within the time permitted by the Caretaker, failing which he/she shall forfeit the				
	deposit paid. The Director: Culture and Amenities may, if required, increase the minimum deposit.				
	Should the hall or facility been booked by a hirer, and the facility is required for use by Council, the				
	hirer will be requested to use an alternative hall or facility available from Council.				
	Halls shall not be used as overnight accommodation and will be available daily from 08h00 to 24h00.				
	Penalty fees of R500,00 per hour or part thereof shall be levied in instances where the halls are not vacated by 24h00 (Shows and exhibitions with a duration of more than one day exempted.)

Account	ons: It: Is a grouping of premises/points of delivery according to the same voltage or location.		
) Energy Charge: Is a charge for each unit of energy consumed typically charged for as or R/MWh. For some tariffs the charge may be time and/or seasonally differentiated.		
	Istration Charge / Basic Charge: It is a contribution towards fixed costs such as meter		
	, billing, administration and maintenance input and is a fixed charge payable every month relectricients consumed or not.		
	l Utilised Capacity: Is the higher of the customer's NMD or maximum demand, measured in		
kVA. re	existered during a rolling twelve month period.		
	: Is the process of producing and delivering a bill (an account or invoice) for payment by a er, calculated from the tariff schedule or as per agreement between the parties (e.g. special		
	agreements), and for the majority of customers, the consumption measured and recorded by the		
meterine	r system.		
	Period: Is the period from one meter reading date (actual or estimated) to the following meter		
Charge	date (actual or estimated). table Demand: Is the highest average demand measured in kVA in a billing month during the		
	ble time periods specified for each tariff.		
	sable Time Periods: Are the time periods when demand registered will be charged for. The		
	ble time periods differ and are described with the respective tariff. Alective Tariffs: Are tariffs that distinguish between the unique cost components (or cost		
	for a specific customer or customer class and where the cost components recover the full		
economi	ic cost to supply electricity to that customer		
	Demand Charge: Applicable to Scale 4 and 5 tariffs, is a R/kVA charge per premise which mally differentiated and is based on the chargeable demand registered during the month in order		
	rer neak energy costs.		
	ted Load: The total connected load of an installation reduced by the diversity Factors		
	ng to SABS : 0142 : 1993.		
(SABS I	oltage: A nominal voltage of 132 000 Volt (± 5%) between any of the three phase conductors		
	istomer: Is a customer identified by the Municipality that receives special services or		
	es/records more than four 500 kVA recordings on contiguous sites.		
	ed Area of Supply: Is an area for which the National Electricity Regulator of South Africa A) has issued a licence to the Municipality under the provisions of the Electricity Act, No. 41		
	A) has assued a needed to the municipality finder the provisions of the electricity Act, 190, 41 as amended, for supply of electricity in that area. Newcastle Municipality tariffs are only		
applicab	ble where the Municipality is licensed to supply.		
Load Fa	actor: Is a ratio between the actual energy consumed and the energy that could have been ed had the demand remained at the maximum for a usage period.		
	ed had the demand remained at the maximum for a usage period. bltage: A nominal voltage of 400 Volt (± 10%) between any of the three phase conductors and		
230 volt	(1+10%) between any phase and the neutral conductor (SABS 1019)		
	um Demand: Is the highest averaged demand measured in kVA or kW during any integrating		
period (i	(normally 30 minutes) within a designated billing period (during all time periods).		
Maxim	um Demand Charge: Payable for each kilovolt-ampère (kVA) supplied by the Council to a		
consume	er during the demand integrating period of 30 (thirty) consecutive minutes in the month or such		
	riods in the month as may be authicable m Voltage: A nominal voltage of 11 000 Volt (± 5%) between any of the three phase		
	m Voltage: A nominal voltage of 11 000 volt (± 5%) between any of the three phase core (SABS 1019)		
Monthly	ly Utilised Capacity: Is the higher of the customer's NMD or maximum demand, measured in		
	egistered during the billing month.		
	k Charge: Is a charge payable per premise every month. The purpose of the network charge cover part of the fixed network costs (including capital, operations, maintenance and		
refurbish	hment) associated with the provision of network capacity required and reserved by the		
custome	er. For some tariffs the network charge is unbundled into a Network Demand Charge (NDC)		
	Network Access Charge (NAC) k Demand Charge: Is a charge that recovers network costs on a variable basis and is		
	for the chargeable demand registered during the month.		
Network	k Access Charge: Is a charge that recovers network costs on a fixed basis and is based on the		
	utilised capacity.		
	d Maximum Demand (NMD): Is the maximum demand notified in writing by the customer opted by the Municipality, that the customer requires the Municipality to be in a position to		
supply o	on demand during all time periods. It is normally the capacity that the Municipality will		
reserve f	for a customer for the short term, i.e. the following year. One calendar-month's notice must be		
misson in	writing by the consumer to the Council of any increase or decrease in the notified maximum		
	and of the date upon which the revised supply is made available, the notified maximum shall be increased or decreased accordingly. Note: The notification of demand is governed		
demand	of rules called the NMD rules.		
demand demand			
demand demand by a set			
demand demand by a set Point of	f Supply: Means a physical point on the electrical network where electricity is supplied to the		
demand demand by a set Point of custome			

	Actual 2016/2017 Tariff	2017/2018 Tariff	Actual 2018/2019 Tariff	2019/2020 Final Tari
Premise or Point of Delivery: Means either a single Point of Supply or a specific group of Points of				
Supply located within a single substation, at which electricity is supplied to the customer at the same				
declared voltage and tariff, and can be a metering or summation point. Rate Components: Are the different charges associated with a tariff that recover different costs, for				
example energy charge. Rate-rebalancing Levy: Is a separate rate component, shown on Scale 5, Time-of-Use tariff for				
customers' bills and indicating inter-tariff subsidies (subsidies between tariffs) in a more transparent manner. The rate-balancing levy is applied to the total active energy consumption and is not subject to				
the voltage and/or transmission surcharge. Reactive Energy Charge: Is a charge applicable if applied, to Time-of-Use tariff and is based on the				
reactive power used. It is levied on every kwarh (reactive energy) which is registered in excess of 30% of the kWh (active energy) supplied during the specified periods of the month. There is no				
reactive energy charge for a customer operating with a legging power factor of 0,96 or better. The method of calculating this excess differs and is described with the respective tariff.				
Single-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase-to-neutral. The neutral carries the				
full load current. Tariff: Is a combination of monthly charges each at particular rates that are usually escalated				
annually and are applied to recover measured quantities such as consumption and capacity costs and				
unmentured quantities such as service costs. Three-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase to neutral; 400 V r.m.s. phase-to-				
phase (120" vector phase displacement. Time-of-Use (TOU) Tariff: Is a tariff that has different energy rates for different time periods and				
seasons in order to more accurately reflect the shape of the Municipality's long run marginal energy cost of supply at different times.				
Voltage Surcharge: Is a percentage surcharge levied to customers with lower supply voltages as a				
contribution to the cost to transform electricity from 11 kV to lower voltages. It is calculated as a percentage of the active energy charge, the energy demand charge (where applicable) and the network				
charge to reflect the higher cost at lower voltage. Conditions applicable to all fariff scales				
a) A consumer may apply to the Council to be billed on either the standard or the Time-of-Use tanff. A				
consumer may not apply to change over from the standard to the Time-of Use tariff or from the Time-of-Use to the standard tariff more than once in a period of 12 months				
(b) A consumer may apply to the Council to reduce or to increase the size of a circuit breaker (MCB) or the notified maximum demand. A consumer may not apply to reduce a circuit breaker or to reduce the				
notified maximum demand more than once in a period of 12 months				
(c) Definitions not covered by the Council's Bylaws will be the same as those recorded in the Eskom Tariff of Charges.				
(d) All infra structure up to the point of supply remains the property of the Newcastle Municipality and shall be handed over in accordance with the Electricity Department's standards, Maintenance of these				
assets and replacement will therefore be for the Newcastle Municipality's account.				
Scale 1: 20A domestic supplies (a) This scale shall also apply to indigents with a maximum estimated load of 20A single phase
